

Replace with nothing (plain text search and replace):

```
class="body-text"
class="body-text _idGenParaOverride-1"
class="Normal--Web- ParaOverride-14"
class="Normal--Web- ParaOverride-15"
class="Normal ParaOverride-12"
class="body-text ParaOverride-6"
```

Replace with nothing (Regex):

```
<span class="CharOverride-34">(.*?)</span> --> \1
<span class="CharOverride-11">(.*?)</span> --> \1
<span class="CharOverride-26">(.*?)</span> --> \1
<span class="Emphasis _idGenCharOverride-1">(.*?)</span> --> \1
<span class="CharOverride-47">(.*?)</span> --> \1
```

Replace obsolete index references with nothing (Regex):

```
<a id="(.*?)></a>
```

"No-Indent"

-->

"no-indent"

REPLACE ITALICS WITH EM TAG:

```
<span class="Emphasis">(.*?)</span>
<span class="Italic">(.*?)</span>
<span class="Italic _idGenCharOverride-1">(.*?)</span>
<span class="Emphasis _idGenCharOverride-1">(.*?)</span>
<span class="Italic _idGenCharOverride-1">(.*?)</span>
<span class="Italic _idGenCharOverride-2">(.*?)</span>
<span class="Emphasis _idGenCharOverride-2">(.*?)</span>
<span class="CharOverride-19">(.*?)</span>
<span class="Emphasis CharOverride-38">(.*?)</span>
```

-->

```
<em>\1</em>
```

Fix bold, but be careful as some epub output is incorrectly marked as bold and in that case the span tag should be simply removed altogether:

```
<span class="Bold">(.*?)</span>
```

```
<strong>\1</strong>
```

Fix header 1

```
<p class="Headings_Introduction-Title">(.*)</p>
<p class="Headings_Chapter-title-for-page-top">(.*)</p>
<p class="Headings_Numbered-Chapter-title">(.*)</p>
```

-->

```
<h1 class="pagebreak_before">\1</h1>
```

Fix subtitles and make header 2:

```
<p class="Headings_Sub-heading-after-quote">(.*)</p>
<p class="Headings_Sub-heading">(.*)</p>
<p class="Hedings_Sub-heading">(.*)</p>
<p class="Headings_Sub-heading-after-quote">(.*)</p>
<p id="_idParaDest-[0-9]" class="Headings_Sub-heading">(.*)</p>
<p id="_idParaDest-[0-9]+" class="Headings_Sub-heading">(.*)</p>
```

-->

```
<h2>\1</h2>
```

```
<p class="Body-Text-BREAK">* * *</p>
<p class="Body-Text-BREAK">* * *</p>
<p class="Body-Text-BREAK">* * * </p>
```

-->

```
<h2>* * * </h2>
```

Fixing footer and align right

```
class="Footer"
```

-->

```
class="right"
```

```
class="Footnote"
```

-->

```
class="small"
```

Removing hr line and adding h3 Notes header

```
<hr class="HorizontalRule-1"/>
```

-->

`<h3>Notes</h3>`

FIXING QUOTES

"Blockquote-first" "Blockquote-last" "Blockquote-middle" "Quotes-documents_Indented-Quote-Solo" --> "blockquote"

Fix UK quotes:

"Quotes-documents_Indented-Quote-first" "Quotes-documents_Indented-Quote"
"Quotes-documents_Indented-Quote-first---no-spacing" "Quotes-documents_Indented-Quote---no-spacing"
"Quotes-documents_Indented-Quote---no-spacing-end" "Quotes-documents_Indented-Quote---middle" --> "blockquote"

Then do regex to get proper blockquote tag wrap:

```
<p class="blockquote">(.*?)</p> -->  
<blockquote>  
<p class="no-indent">\1</p>  
</blockquote>
```

OR lately

```
<p class="blockquote">(.*?)</p>
```

Then

```
</blockquote>                <blockquote>
```

-->

(nothing)

FOOTNOTES

Add anchors for half-way MIA notes

```
a href="notes.html#n(.*?)"
```

-->

```
a href="#n\1" id="f\1"
```

In the footnotes at bottom:

```
<a id="n(.*?)"></a>(.*?)</span>
```

-->

```
<a href="#f\2" id="n\1">[\2]</a></span>
```

For fixing ebook footnotes and make superscript:

First remove the italics:

```
<em class="number-suffix">(.*)</em>
```

```
-->
```

```
\1
```

Then:

```
class="_idFootnoteLink _idGenColorInherit"
```

```
-->
```

```
class="superscript"
```

Then to replace superscript class with `<sup>` for HTML standardisation:

```
<a class="superscript"(.*)</a>
```

```
--->
```

```
<sup><a \1</a></sup>
```

To add square brackets to footnotes using regex:

```
[0-9]+<\a><\sup>
```

```
-->
```

```
[\0]
```

Then

```
</a></sup>]
```

```
-->
```

```
]</a></sup>
```

```
backlink">[0-9]<
```

-->

>[\0]<

Then in normal mode

>[backlink">

-->

backlink">[

OBSOLETE AND TIME-CONSUMING

Then:

add square brackets using normal search and replace:

>1</sup>

-->

>[1]</sup>

(in text)

and

backlink">1<

-->

backlink">[1]<

(also)

<a class="superscript" (.*)

---->

^{<a class="superscript" \1}

(*)

-->

```
<sup><span class="superscript" id="footnote-\1-backlink">\2</span></sup>
```

also variation

```
<span class="superscript"><span id="footnote-(.*?) -backlink">(.*?)</span></span>
```

```
<sup>sup
```

FOOTNOTES FROM SCRATCH:

```
<h3>Notes</h3>
```

```
<p class="small"><a href="#doc-1" id="foot-1">[1]</a> Amalgamated Engineering Union</p>
```

```
<sup><a href="#foot-1" id="doc-1">[1]</a></sup>
```

```
<sup><a href="#foot-2" id="doc-2">[2]</a></sup>
```

```
<sup><a href="#foot-3" id="doc-3">[3]</a></sup> (in text)
```

```
<a href="#doc-2" id="foot-2">[2]</a> (in footnote)
```

Regex magic for footnotes up to 3 digits (in text)

```
(\[](\d{1,3})(\||,)
```

-->

```
<sup><a href="#foot-\2" id="doc-\2">[\2]</a></sup>
```

Regex magic for footnotes up to 3 digits (in footnotes at bottom)

```
(\[](\d{1,3})(\||,)
```

-->

```
<a href="#doc-\2" id="foot-\2">[\2]</a>
```

Clean up footnotes in text:

```
<span class="CharOverride-1">(.*?)</span>
```

```
<span class="CharOverride-2">(.*?)</span>
```

-->

```
\1
```

```
<em class="number-suffix">(.*?)</em>
```

```
<em class="number-suffix _idGenCharOverride-1">(.*?)</em>
```

-->

\1

REPLACE curly double quotes with curly single quotes

“(.*?)”

-->

‘\1’

([0-9]+)

-->

[\1]

END

(unsure about the ones below, or obsolete. No need for them but keeping them for reference)

REPLACE sup stuff

<em class="number-suffix">th

MAKE FOOTNOTES SUPERSCRIPIT

<a href=(.*?)

^{<a href=\1}

Remove MIA inital cap

(.*

-->

/1

Fix indent being absent:

<p class="blockquote">(.*</p>

<p>

-->

`<p class="blockquote">\1</p>`

`<p class="no-indent">`

ALSO

...

Make footnotes superscript:

``

--->

``

REGEX magic for number 0-999

`class="block_([0-9]|[1-9][0-9]|[1-9][0-9][0-9])"`

FIX UK superscript:

`number-suffix _idGenCharOverride-1`

`number-suffix _idGenCharOverride-2`

`superscript`

THEN

`<em class="superscript">(.*?)`

`\1`

Also:

`<em class="number-suffix _idGenCharOverride-2">(.*?)`

`\1`

Remove UK index marks:

``

<p class="Heading-3">(.*?)</p> --> <h3>\1</h3>

Spanish InDesign fixes

(.*?)
(.*?)
(.*?)
(.*?)
(.*?)

-->

\1

Body-Text ParaOverride-5

-->

no-indent

p class="Body-Text ParaOverride-7"

-->

p

<p class="Heading-3 ParaOverride-1">(.*?)</p>

-->

<h1 class="pagebreak_before">\1</h1>

<p class="Normal ParaOverride-2">(.*?)</p>

-->

<h2>\1</h2>

<p class="Body-Text ParaOverride-21">(.*?)</p> -->
<blockquote>
<p class="no-indent">\1</p>
</blockquote>

CLEAN UP EPUBLIOBRE FILES

```
<p class="titulo">(.*?)</p>
```

```
